

RICHARD HOULIN WANG

hwang374@ucsc.edu | rhwang.sites.ucsc.edu | 1156 High St, Santa Cruz, CA 95064

Education

University of California, Santa Cruz <i>Ph.D. in Linguistics (Specialization in Phonology/Computation)</i>	Santa Cruz, CA <i>Expected 2026</i>
• Honors & Fellowships: THI Summer Dissertation Fellowship (\$5,000), THI Summer Public Fellowship (\$6,000), Graduate Communications Fellowship, Science Internship Program Fellowship	
University of California, Los Angeles <i>M.A. in Linguistics (GPA: 3.97) B.A. in Linguistics, Magna Cum Laude (GPA: 3.95)</i>	Los Angeles, CA <i>2018 – 2022</i>
• Honors & Specialization: Department Scholar & Departmental Honors, Specialization in Computation, Minor in Japanese	

Professional & Research Experience

UC Santa Cruz <i>Graduate Quantitative Researcher</i>	Santa Cruz, CA <i>2022 – Present</i>
• Structured ambiguous research questions into testable hypotheses; designed and executed experimental studies collecting 13,680+ recorded trials across 85 participants. • Engineered automated data collection and signal processing pipelines using custom Python and R scripts, dramatically reducing manual extraction time while enforcing rigorous data quality protocols. • Applied mixed-effects linear and logistic regression models to datasets with 2,000+ observations across 8 interacting variables to evaluate structural constraints and predict probabilistic outcomes. • Communicated complex quantitative findings across 6 peer-reviewed conference publications and invited talks to international audiences of up to 1,000+ domain experts.	
Living Tongues Institute for Endangered Languages <i>AI Evaluation Research Fellow</i>	Remote <i>Summer 2026</i>
• Evaluated commercial AI speech-to-text models across novel language contexts, producing synthesized performance analysis and deployment recommendations for leadership. • Managed and structured 90+ hours of unstructured audio data; established standardized quality-control protocols across a cross-functional remote team of researchers.	
Science Internship Program (SIP), UC Santa Cruz <i>Research Mentor & Instructor</i>	Santa Cruz, CA <i>Summer 2026</i>
• Designed and executed an 8-week structured computational research curriculum for high school interns, managing project deliverables and weekly milestones. • Delivered 24+ hours of instruction and technical support in Python/R setup, automated speech alignment, and statistical analysis, guiding interns from raw data to final executive presentations.	
UCLA Phonology & Language Processing Labs <i>Research Assistant</i>	Los Angeles, CA <i>2019 – 2021</i>
• Developed algorithms in Python to predict distributional patterns across 10,000+ dictionary entries; built reproducible analysis pipelines using R and regular expressions for large-scale lexical datasets. • Managed experimental operations, participant scheduling (130+ participants), and protocol documentation across multiple cognitive science studies.	

Leadership & Project Experience

UCSC Linguistics Department	Santa Cruz, CA
• Equity in Linguistics Committee Member (2023–2025): Organized events promoting international, gender, and academic equity; synthesized departmental feedback to advise faculty and managed catering logistics for 30+ attendees. • Committee Chair (2023–2024): Managed logistics, team coordination, and budgets for 5+ departmental events serving 50+ attendees. • Newsletter Editor (2023–2024): Managed editorial calendar and coordinated 10+ contributors to publish monthly departmental newsletters.	

Quantitative & Technical Skills

Data Analysis & Statistics: R (Mixed-effects regression, linear/logistic modeling, hypothesis testing), Python, SQL, Advanced Excel (Regex, Data Cleaning)
Technical Tools: Git, LaTeX, Database Management, Automated Audio Processing Pipelines, Signal Processing
Languages: Mandarin Chinese (Native), English (Fluent), German (Working Proficiency), Japanese (Working Proficiency)
Interests: Rock Climbing / Bouldering, Weightlifting, Travel Optimization & Loyalty Programs
